EDUCATION

Manipal University Jaipur
Masters in Computer Applications

Jaipur, Rajasthan
Sept 2026 — 2028

Siliguri College
Bachelor's of Science, Computer Science

Siliguri, West Bengal
Jul 2021 — Nov 2024

- Cumulative GPA: 7.47/10 | Swami Vivekananda Merit-cum-Means Scholarship

St James School Binnaguri
High School Graduate

Binnaguri, West Bengal
Apr 2009 — Jul 2021

- Percentage: 84.5% | 100% Attendance (2014-2015, 2015-2016, 2016-2017, 2017-2018)

PROJECTS

Weather Prediction App (github.com/4nubhav-v/Mausambata)

Jan 2026 — Present

- Built a full-stack weather forecasting application using **Next.js** (App Router) and **React** with strict **TypeScript**, integrating the **Open-Meteo API** for real-time and forecast weather data.
- Designed a component-driven UI system with shadcn/ui and Base UI primitives, styled with **Tailwind CSS** v4, ensuring accessible and reusable component architecture.
- Implemented light/dark theme switching using next-themes and added micro-interactions/animations with **Motion** (Framer Motion) to improve UX polish.
- Enforced code quality via **ESLint** and **Prettier** for consistent formatting across the codebase.
- Deployed the application on **Vercel** with continuous deployment from main, delivering a production-hosted live demo.

Self-Hosted Home Server

2025 — Present

- Deployed and administer in single **SBCs (Raspberry Pi 4)** home server booting from an SSD for improved I/O reliability and endurance.
- Self-host a **Nextcloud** instance via **Docker** and designed a unified setup that support **rsync**-based backup and restore workflows.
- Manage the system over **SSH**, including safe shutdown procedures and a GPIO-triggered shutdown button overlay to prevent filesystem corruption on power loss.
- Use of **Tailscale** that enables encrypted point-to-point connections using the open source WireGuard protocol, which means only devices on your private network can communicate with each other In/Out of the home network
- Hands-on experience with Linux utility and tools like port checking, port scanning system administration: service management, container networking, storage layout, and permissions troubleshooting outside a managed cloud environment.

First.fm (github.com/4nubhav-v/first.fm)

May 2025 — Oct 2025

- Integrated **ListenBrainz APIs** to retrieve real-time music listening status
- Used **coverarchive.org** to fetch album art
- Enabled accurate and dynamic updates within the application ecosystem
- Built reusable components for use in other projects, promoting code modularity and faster development cycles

SKILLS

- Languages:** HTML/CSS, JavaScript, TypeScript, C/C++20, Python, PHP
- Framework:** Astro, Nextjs, Expressjs
- Developer Tools:** Firefox, Linux, SBCs (Rasphberry Pi 4), CodeOSS, Neovim, Figma, Obsidian
- Technologies:** React, Node.js, Git, Tailwind CSS, SQL, Threejs, Vercel, Nextcloud, Github, Motion, Bash, Nginx, Typst, Tailscale (WireGuard), SSH
- Soft Skills:** Problem Solving, Communication, Design Planning, Self-Directed Learning, Technical Research

LANGUAGES

- English:** Advanced
- Hindi:** Proficient

CERTIFICATIONS

The Web Developer Bootcamp, Udemy

Mar 2025

EXTRACURRICULAR ACTIVITIES

Local Guide

26th Dec 2019 - 31th Dec 2019

- Got awarded for being assign as Guide in **Alipurduar Nature Club** in collaboration with **Buxa Tiger Reserve, Alipurduar**
